REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The independent claims 1, 4 are identifies the uniquely distinct feature for

"a reduce a reduced-image storing section reducing a designated image contained in the video data and storing the reduced image in the recording medium, if the determination section determines that the image data is the copy-unrestricted-enabled data

a inhibition section inhibiting a storage operation of the reduced-image storing section, if the determination section determines that the video data is the only-one-generation-copy-enabled data"

Nakamura, US 6,6003,576 discloses a method and apparatus for superimposing additional information onto image information in a manner such that the additional information is inconspicuous on the displayed image. The dithered and noise-added additional information signal is superimposed with the image signal, and recorded on a storage medium.

Ogino, US 6,802,011 discloses performing signal processing of information signals to which copyright protection information (such as copy control information) has been added, signal processing which would make detection of copyright protection information difficult or impossible is restricted, based on the copyright protection information detected from the information signals.

None of the prior art, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious. Claims 2, 3, 5, 6 are dependent on claim 1 and 4 and therefore also allowable.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
